

3G/HD-SDI Press DA

CP Communications

1x12 Audio Video Distribution Amplifier

- 12 Reclocked SDI Outputs
- 1 Non-Reclocked SDI Loop Output
- 270Mb/s, 1.5Gb/s, 3Gb/s
- Reclocking & Equalization
- Automatic Input Rate Detection
- DVB-ASI compliant at 270 Mb/s
- 12 Isolated balanced audio outputs

The CP Press Distribution Amplifier is an SDI digital video (3G, HD & SD) 1x12 Distribution Amplifier, with 12 audio outputs of either the embedded audio (Group 1, Ch1) or a separate XLR audio input. The unit is able to distribute 3Gb/s, 1.5Gb/s & 270Mb/s data rates. It automatically detects the data rate and then re-locks and equalizes the signal. The Distribution Amplifier can equalize 400m @ 270Mb/s, 200m @ 1.5Gb/s and 140m @ 3Gb/s of 1694A coax cable. A non-reclocked loop output is also provided.
