Live streaming directly to multiple outlets, simultaneously (social media, CDN)

Create your own online channel by adding advertisement, overlays and tickertape.

Stitching, Image correction and de-warping

Automated Video Director based on Artificial Intelligence

Remote management and monitoring

Subtitles

Integrated camera director with smooth virtual camera operation

The IP Sports Producer is an all-in-one production suite. It's simple and intuitive interface allows anyone to produce and stream a game anywhere, with no on-site crew needed!

The IP Sports Producer makes live and on demand web broadcasting available without the hassle of setting up multiple cameras and hiring a camera crew. The system provides an automated video broadcast production with a one 180

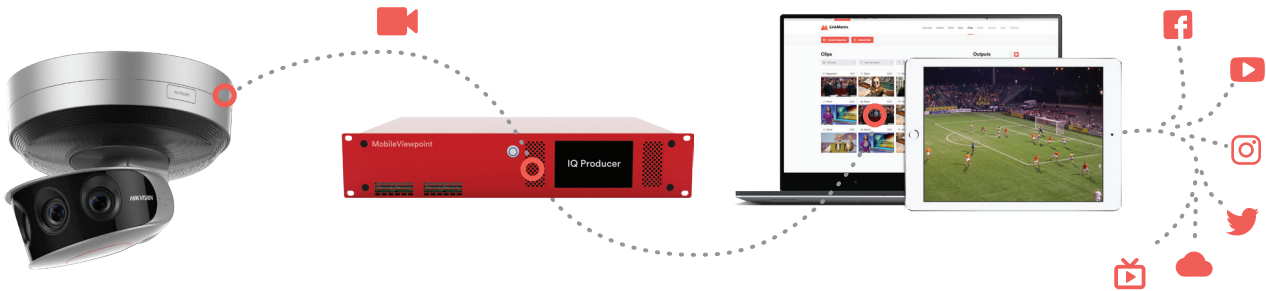

degrees camera installation. The superb de-warping and stitching technology provides a natural looking corrected image with straight line markings. With this technology cost effective cameras can be used for complete coverage of the playing field. A pan and zoomed image is automatic created by special developed game tracking technology. With extra features such as live streaming, game replay generator,

commentary and scoreboard options the IQ Sports Producer enable clubs to capture, stream and re-publish their field games easy and cost effective.

ADVANTAGES

- All-in-one low-cost solution
- Software is based on machine learning (AI) software
- One box operation
- Scalable platform
- Remotely manageable

The complete platform consists of the following elements

24MP 180 degrees camera to cover the entire playing field

2U MVP PC box with IQSP Software

IQSP LinkMatrix Online management dashboard

Technical specs

CAMERA - 24MP CAMERA

- 1/1.8" Progressive Scan CMOS
- 8208 × 3072 @ 30fps
- FOV: horizontal 180°, vertical 80°
- H.265, H.264
- Fiber optic transmission
- IP66

2U MVP PC BOX WITH IQSP SOFTWARE

- IQSP Software
- 1-4 camera inputs
- H.265/H.264
- 10 Bonded 4G/IP connections
