

RF7 Event Communications & Production Trailer

A Turnkey Solution for All Large-Scale Live Events

Producing an outdoor music festival demands uncompromising quality and the absolute reliability of every component. This mandate goes for security and communications as much as it does staging, sound, lighting and video production.

To meet this requirement, industry leaders CP Communications and DC Rentals have joined forces to offer a best-of-breed production solution ideal for music festivals, sporting events, municipal celebrations, parades, fairs or any other large-scale entertainment event.

Featuring IP cameras, two-way radios, cell and satellite phones, digital trunking and event-day technical staffing, the turnkey RF7 communications and production trailer possesses the scalability to handle massive events with tens of thousands of attendees.

Consolidated in a 53-foot truck, RF7 can be deployed in a flash to any location in North America. A high-end command center on wheels, the unit is capable of distributing HD video content over RF, Wi-Fi and bonded cellular networks, and trunking thousands of radios and hundreds of surveillance cameras. It enables the display of live and recorded video, easy assignment of cameras via drag and drop, sophisticated split views and customized monitoring layouts. Its CCTV system also allows for iOS and Android mobile devices to remotely monitor live and recorded video.
