

Fast Return WebRTC

Innovating the way low-latency video is provided through a cloud-based management platform, this video streaming solution is scalable, flexible, and secure – allowing you to view your production from anywhere on any device.

What's Included

- Client portals for management and access of streams
- Custom user pages and templates available
- Safe and secure authentication process
- Base package includes 5 streams and up to 100 users
- Can ingest any H.264 Baseline Profile RTMP stream
- RTMP encoders available
- 2-10 MB/s, typically 4 MB/s bitrate is preferred at HD resolutions
- Ability to spin up edge servers anywhere around the world for lower latency and greater reliability
- 128kbit stereo audio, dual mono is preferred
- Video orientation on mobile devices
- Monthly or per event license available. Contact us for more information.
